2

Complete with a polite request: I ____ some water, please.

3

Ask in a restaurant: you want to know the price of the soup.

Today's Agenda

Unit 3: Let's Order!

- 01 Reading: Mina's Restaurant
- 02 Design Your Own Order (writing)
- 03 Live Interview — 3 Scenarios (speaking!)

Not much new grammar today — this is a practice day. Reading, then writing your own ideas, then SPEAKING live!

SECTION 1

Money and Prices

How do you SAY \$7.50 out loud?

Money and Prices

The Rule

Whole dollars: just say the number + "dollars." With cents: say the two numbers together, like a time — "\$7.50" = "seven fifty."

Price	Say it (common)	Say it (formal/full)
\$2.00	two dollars	two dollars (and zero cents)
\$1.00	one dollar	one dollar — NOT "one dollars"!
\$4.50	four fifty	four dollars and fifty cents
\$9.50	nine fifty	nine dollars and fifty cents
\$0.50	fifty cents	fifty cents (no "dollars")

⚠️ "\$1.00" is always "one dollar," never "one dollars."

💡 When to use each form: the **SHORT** form ("seven sixty-seven") is normal, everyday spoken English — what you'll hear and use most. The **FULL** form ("seven dollars and sixty-seven cents") is for formal writing or when you need extra clarity — like on the phone.

Teen vs. Ty: Don't Mix Them Up!

13 and 30 sound similar — but the stress tells you which is which.

The Rule: -TEEN numbers stress the SECOND syllable and end with a clear "n" — thir-TEEN. -TY numbers stress the FIRST syllable and end soft, no "n" — THIR-ty.

13 thirTEEN

14 fourTEEN

15 fifTEEN

16 sixTEEN

17 sevenTEEN

18 eighTEEN

19 nineTEEN

30 THIRty

40 FORty

50 FIFty

60 SIXty

70 SEVenty

80 EIGHty

90 NINEty

💡 *Trick: if the stress goes UP at the end and you hear a clear "n," it's a TEEN number.*

3. fourteen fifty

4. forty fifty

5. \$60

2. \$30

6. \$16

1. \$3.00

2. \$6.50

3. \$1.00

4. \$8.50

5. \$0.50

6. \$10.00

Say the Price: Answers

1. Three dollars.

2. Six fifty.
